Hiring Team

Inetum

Porto, Portugal

APPLICATION FOR DESKTOP SUPPORT TECHNICIAN

Dear Hiring Team,

I am writing to apply for the Desktop Support Technician position at Inetum. With a degree in Computer Engineering, technical training in Computer Networks and Systems, and practical experience in end-user support, incident management and workplace technologies, I believe my background is strongly aligned with this role.

At NewCoffee, I provided first-line technical support to hundreds of users across five locations, handling approximately 20 to 40 daily requests. I diagnosed and resolved hardware, software, account, access, printing and connectivity incidents; prepared Windows computers and mobile devices; and supported corporate applications and network services. I also installed software, managed user accounts and permissions, and escalated cases to internal teams or external providers when additional intervention was required.

I also contributed to an internal ITSM and asset-management platform used to organize incidents, requests, users, equipment and operational information. This strengthened my ability to document troubleshooting steps, maintain asset records, prioritize requests and follow incidents through to resolution. My previous positions at Staples EasyTech and Aquário Eletrónica further developed my customer-service skills and hands-on experience supporting and configuring end-user equipment.

I work effectively both independently and with technical teams, and I communicate clearly with users at different levels of technical knowledge. I am motivated to deepen my experience with ServiceNow, macOS and enterprise support practices. My current Master's degree in Cybersecurity and Computer Systems Auditing also reinforces my awareness of security, access control and responsible handling of organizational information.

I am available to work on-site in Porto, support different office locations and participate in shift rotations when required. I would welcome the opportunity to contribute my technical knowledge, customer-oriented approach and commitment to continuous improvement to Inetum.

Thank you for considering my application. I would be pleased to discuss my experience and motivation in an interview.

Yours faithfully,

Miguel Magalhães
