

Role: Cyber Security Analyst - Nights

Salary: Competitive

Type: Full time

Location: Remote

About:

Are you a night owl? This is a great opportunity for an individual looking to enter the Cyber Security space and gain valuable skills from a cyber managed service provider.

The business is entering a significant phase of growth and is looking for a Cyber Security Analyst to cover nights and weekends. They are looking for individuals with a passion for information security and delivering customer success. The ideal candidate will have a cyber security educational background or IT background

In this role you will have the opportunity to contribute to the development of cyber security services, that help secure customers environments from all types of cyber-attacks. This is an exciting new role in their Security Operations Centre, where you will learn and develop your skills in defending against malware, hacking activities, and implementing security solutions across both the public and private sector.

As a Cyber Security Analyst, you will be responsible for:

Key Responsibilities

- Adherence to information security policies alongside CREST & ISO standards.
- Proactive monitoring and development of security platforms.
- Be a key part of service roadmap development.
- Manage security incidents.
- Perform threat hunting activities on our customers environments.
- Support customers during cyber incidents.
- Support customers with vulnerabilities affecting their organisation.
- Ensure SLAs are met, by follow up with internal and customer stakeholders for information and updates.
- Support customers with remediation activities.
- Flexible overnight working hours.

Required skills and qualifications

- Good Cyber Security related degree
- Strong written and verbal English communication skills.
- Knowledge of Windows and Linux operating systems.
- Knowledge of public cloud (Azure/AWS/GCP).
- Strong written and verbal communication skills.
- Able to work under own initiative and as a team player.
- Positive and Proactive self-starter with the aptitude to learn.
- Analytically minded.
- Ability to work in a fast-paced, high-intensity, continually evolving industry.

Desirable

- 2+ years industry IT experience.
- Familiar with ticketing systems.
- Hands on experience with a SIEM/SOAR product, specifically Microsoft Sentinel vulnerability management toolsets and Public Cloud platforms.
- Ability to communicate complex, technical scenarios at a high level.
- Presentation skills.
