

PROFESSIONAL SKILLS DOCUMENT

Miguel Magalhães

IT Support and Systems Technician

[1+ YEAR OF DIRECT IT SUPPORT EXPERIENCE]

EXPERIENCE SUMMARY

Computer Engineering graduate and current Master's student in Cybersecurity and Computer Systems Auditing, with more than one year of direct IT support experience and additional practical training in networks, systems and software development.

At NewCoffee, I provided first-line support to hundreds of users across five locations, handling approximately 20 to 40 daily requests involving Windows devices, hardware, software, accounts, access, printing, connectivity, Microsoft 365, VPN and business applications.

I have practical experience with Active Directory, incident tracking and escalation, Microsoft SQL Server, SQL queries, IT asset information and technical documentation. I also contributed to an internal ITSM and asset-management platform integrated with SQL Server.

My experience is complemented by customer-facing technical support at Staples, Python automation and SQL Server work at Aquário Eletrônica, and production web application development. I communicate in English at B2 level and am motivated to progress in L1/L2 and application support.

TECHNICAL SKILLS

This image shows a single page of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page, leaving small margins at the top and bottom. There is no handwriting or other markings on the paper.

PROFESSIONAL EXPERIENCE

NewCoffee - Indústria Torrefatora de Cafés, S.A. - IT Technician

November 2025 - July 2026

Context

First-line IT support and internal systems support across a multi-site business environment.

Activities

- Provided first-line support to hundreds of users across five locations, handling approximately 20 to 40 daily requests.
- Diagnosed and resolved hardware, software, account, access, printing, connectivity and business-application incidents.
- Prepared, configured and maintained Windows computers, laptops, printers, mobile devices and peripherals.
- Created and managed user accounts, groups, permissions and access through Active Directory and internal systems.
- Supported Microsoft 365, ERP applications, VPN, telephony, DHCP, remote access and network connectivity.
- Registered, prioritised, documented and followed incidents, escalating complex cases to internal teams or external providers.
- Contributed to an internal ITSM and asset-management platform using web technologies and Microsoft SQL Server.

Technologies

Windows, Active Directory, Microsoft 365, Microsoft SQL Server, SQL, VPN, DHCP, ERP, React, PHP, JavaScript, Python, IIS, Git

Clínica Dr. Luís Couto - Freelance Web Developer

May 2026 - August 2026

Context

Development and production delivery of a full-stack appointment-booking platform for a healthcare client.

Activities

- Developed a responsive interface using React, TypeScript, Vite and Tailwind CSS.
- Integrated an external clinical API and an internal serverless API for availability and appointment validation.
- Implemented authentication, database operations, form validation, accessibility and responsive behaviour.
- Configured deployment and environment variables in Vercel and diagnosed integration issues through logs and structured testing.

Technologies

React, TypeScript, Vite, Tailwind CSS, REST APIs, Vercel, Git

Staples Portugal, S.A. - IT Support Technician - Part-time

February 2025 - August 2025

Context

Customer-facing technical support in the EasyTech service area.

Activities

- Diagnosed and resolved hardware, software, peripheral and connectivity problems for customers and colleagues.
- Installed and configured applications on Windows devices and validated their correct operation.
- Supported POS terminals and the SRDS application and recorded incidents in the internal platform.
- Explained technical solutions clearly to non-technical users and recommended appropriate technology solutions.
- Escalated unresolved cases with clear notes and followed their progress with the responsible teams.

Technologies

Windows, POS, SRDS, Hardware, Peripherals, Incident Management

Aquário Eletrónica - IT Intern

February 2024 - July 2024

Context

Practical training in automation, databases, business systems and IT infrastructure.

Activities

- Developed Python scripts for web scraping, data collection and task automation.
- Supported Microsoft SQL Server administration and integration with the Primavera ERP platform.
- Collaborated on local network and computer-systems activities and technical problem analysis.
- Organised technical documentation, planned tasks and prepared weekly activity reports.

Technologies

Python, Microsoft SQL Server, SQL, ERP Primavera, Networking
